

The Noongar Season of the first summer

BIRAK SEASON

DECEMBER-JANUARY

WEATHER

Goodbye rain, hello sunshine!
This time of year we enjoy hot
weather during the day and
welcome the cooler sea breeze
in the afternoon.

FAUNA

It's the season of the young so
look out for newly transformed
frogs hopping near water, baby
birds venturing out of their nests,
and snakes shedding their skins!

FLORA

The bright golden flowers of the
Western Australian Christmas
Tree bloom and small cream
coloured buds appear on the
paperbark tree.

CULTURAL HISTORY

Traditionally, Noongar people
would control-burn bushland to
encourage new growth and to
make it easier to move across the
land.
